Dear Sir or Madam,

Places of Worship Act 1855 and General Rate Act 1967 (If UK)

'Public Place of Worship' Tax-Exemption (generic)

I wish to bring to your attention a matter which should be of serious concern within your authority.

At [*location - address of meeting room*] a group of persons meet for private worship whilst enjoying exemption from paying local taxes on the basis that it is a 'Place of Public Worship'.

I attach some examples of how they barricade their meeting rooms with high fencing all around; the gates are padlocked and, in some cases, barriers are raised from under the ground.

To get round the Law, they post a notice should anyone wish to use this 'Place of Public Worship' they need to phone one of the Trustees. I have also attached some examples of these notices. I suggest you investigate this by calling any numbers on the board at the address above. You will not be allowed to visit the place without being visited several times by members of this sect to establish what your motives are in wanting to use the facility as a place of Public Worship.

This is clearly therefore not a place of public worship.

I draw your attention to a recent High Court case in Brisbane Australia. I have attached some information, but much more is available at a web site that has specific material contained at:

<http://peebs.net/Municipality/>

I trust that you will consider it prudent to pursue the same course.

Your authority is being defrauded. As a local taxpayer, I also feel that I am being defrauded.

Yours faithfully,

Your name and signature

(do not remain anonymous)

PS. You may wish to inform the local Fire Authorities that this 'Place of Public Worship' is not only padlocked on the perimeter, all doors are locked from inside during all of their services. Some of these meeting rooms can seat 50 people or so but most of the others can seat up to five or six hundred members. Should there be an emergency, the Fire and Ambulance Authorities will not be able to access these premises.

Encl/ as applicable
